Sounds good, Amanda.

Thanks.

Good afternoon, Amanda,

I'm emailing to follow up on the latest on this response.

We reached out to our press officer about the DOD document, but we haven't heard back. Since we're approaching the deadline, is there anything that we can answer with now?

Thanks.

-Drew

Good morning, Jeremy,

I went upstairs to follow up with Sonya on this since the deadline is **12 noon tomorrow**.

If she's in the Division Directors meeting, could you please ask her what the latest is/see if we can help? If she's not in there, I'll follow up with her later today.

Thank you.

-Drew

Checked with OPA, below are all the reporter's questions. He's been reaching out to multiple people trying to get a response, so we're working with OPA to make sure we're coordinating our answers. Deadline is noon on Friday. Thanks. - Jeremy

1. What is the EPA's response to suggestions that alternative disposal methods (such as Super Critical Water Oxidation) should have been employed years ago to dispose of the nation's stockpile of munitions?
2. What is the EPA's response to suggestions that not enough is being done at and around OB/OD sites to protect the surrounding environment, as well as the health of workers and local residents?
3. Sent 3/29: I reached out to the DoD for a list of sites where Open Burning/Open Detonation takes place, and the following (italicized) is what they replied with. The problem is, this list is slightly different to the one on the EPA website: <https://www.epa.gov/hwpermitting/list-example-hazardous-waste-permits-open-burning-and-open-detonation>. Is there a reason to explain the discrepancy between the DoD and the EPA's lists?

Our press office confirmed with Nancy Grantham that "HQ" is responding. Not sure who.

I'm going into a meeting and will look at this afterward, but in meantime am looping in our communications group in ORCR. Reporter should have gone through Press Office. Wayne, is Ken in this week?

Thanks for getting back to me, Jon, appreciated. And thank you for the contact numbers.

I'd tried Ken Shuster multiple times already, but he failed to get back to me. I will try the other two contacts you've provided. But just in case they, too, don't respond, I just want to elaborate upon what I'm eager to speak with someone about:

- The original exemption for open burning of waste explosives:

<https://www.law.cornell.edu/cfr/text/40/265.382>

<https://www.epa.gov/hwpermitting/requirements-miscellaneous-hazardous-waste-units>

- The Military Munitions Rule, and how that ties into the open burning of explosives.

Sincerely,

Dan Ross

Good morning Mr. Ross:

Terri mentioned that you might be in contact this week while she is out of the office. I'm unsure what help I could provide, as I am not familiar with the upcoming NAS study in any detail. Terri serves as a member of the national team with our headquarters counterparts, and any commentary regarding the regulatory side of the OB/OD issue should best be addressed by them. I have copied Sonya Sasseville, Michelle Wilson and Ken Shuster on this response as they are the most knowledgeable program leaders who can assist you. Their phone numbers are:

Sonya: 703-308-8648

Michelle: (703) 308-8790

Ken: 703-308-8759

Subject: Open burning/open detonation munitions

Dear Jon --

My name is Dan Ross, I'm a reporter with FairWarning, and I'm working on a story looking at the open burning and open detonation of munitions, and the possible impact the upcoming National Academy of Sciences (NAS) study might have on this practice. This is an issue I know quite well, having written on it twice before. I'm working on an update on the topic for FairWarning.

I'm eager to speak with someone about the regulatory side of the issue within the EPA, and Terri Crosby-Vega recommended that I reach out to you.

If you are able and willing to speak with me, my tentative deadline is this Thursday.

Sincerely,

Dan Ross
